Main Use	All-Around	All-Around: 25% Thinner than standard PowerPro	All-Around: Dense weave 8-carrier line for smoother and quieter performance	Trolling, Jigging: Allows angler to know exactly how much line is out, great for repeatedly making the perfect troll or knowing when your lure stops short while jigging	Offshore Trolling, Deep-Dropping: Allows angler to know exactly how much line is out	Allows anglers to make a highly-efficient knotless splice	Ice Fishing: PTFE Coating sheds water and prevents line freeze	Downrigging: Allows downrigger balls to fall more vertically with less blowback

Enhanced Body Technology

The proprietary “secret sauce” resin permeating process makes PowerPro the roundest, smoothest, and most durable braided fishing line on the market. EBT Technology allows for better castability and management of the line as well as increased abrasion resistance.
